

Juice Centrifuge Type SZ-2000

Application:

The Aerne Analytic Juice Centrifuge is used in the food industry for the determination of the portion of the pulp of fruit in juices. Especially for food makers the Juice Centrifuge is a necessary instrument that is used in many laboratories for the quality assurances. The centrifuge is made of PCV and equipped with a sieve to collect the pulp of fruit.

Technical Data:

Material:	Casing PVC white/Cylinder PVC grey
Dimensions/mm:	LxWxH (total height) 200x200x270 Cylinder diameter: 200 mm
Rate of revolutions:	Controller: 0 -1500 RPM Timer: 0 - 24 hours
Power supply:	230VAC - 50/60 Hz

Order Details:

Part:

Order-No.

Mojonnier Centrifuge Type Ex. 8

Application:

For the determination of fat in milk, suitable for 8 Mojonnier flasks.
Centrifuge with explosion protected control and motor to be used in exprotection areas.

Technical Data:

Casing:	Polypropylene (PP), white
Dimensions LxWxH/mm:	450x450x420
Centrifugal bath:	Aluminium incl. 8 clasps for Mojonnier flasks
Lid:	ESG Safety glass
Motor:	Alternate squirrel cage rotor
Power supply:	3x400V-N-PE

Order Details:

Part:	Order-No.
Ex-type centrifuge for Mojonnier - Type Ex.8	EXZM.8
